

VERTICAL RR2

VERTIGO R²

Vertigo Motors is proud to present the new, Limited Edition, 2020 Vertigo-Vertical-Model R². This new Model R has been revised extensively both internally & externally. It is the direct evolution of its already hugely successful predecessor. This new model benefits from a full year of technical advancements & developments following feedback from our World Championship Factory Team. This ensures the new 2020 R model is even more refined and advanced than ever before.

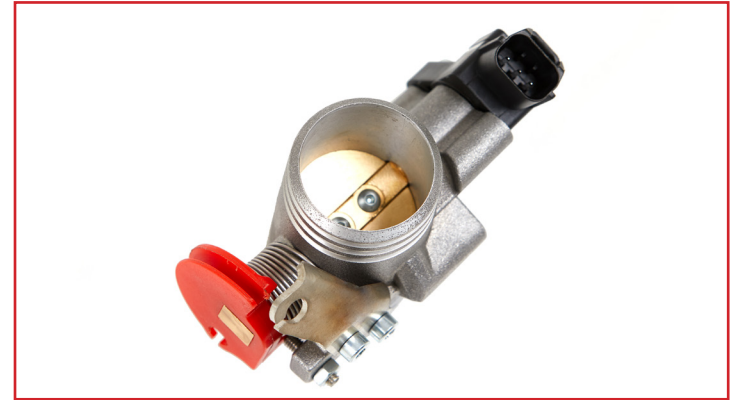

This new racing model is available in the entire Vertigo engine range 125, 200, 250, 280 and 300cc versions. Each of these versions have been subject to a meticulous testing & technical development by our engineers.

If you demand the ultimate in quality, advanced technology & performance, then this is the bike for you!

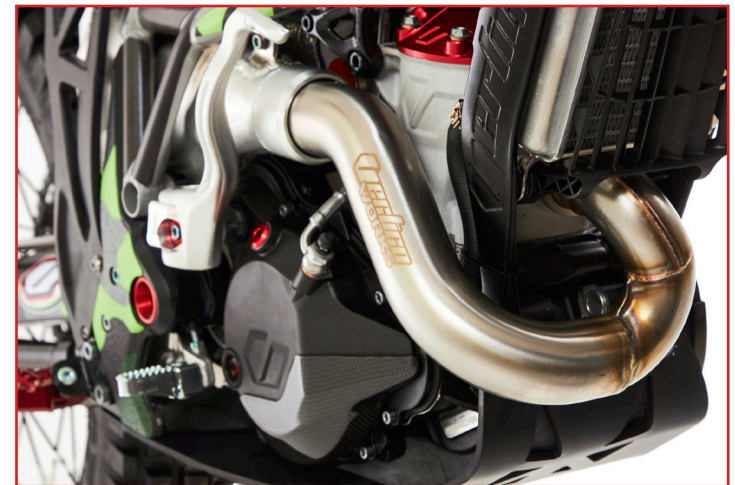

VERTICAL
RR2

Racing Throttle Body: This gives a much faster and even more precise throttle response, throughout the rev range.

New Factory Exhaust: Helps increase engine performance & response.

Intercooler In Anodised Red Finish: Helps to keep the engine running at it's optimum temperature.

New Airbox & Twin Air Filter: This complete redesign of the airbox helps to greatly increase engine performance. It is also much more rigid & slimmer than in previous models. Giving the bike a leaner & more aggressive look.

VERTICAL

New Location Of Mapping Switch: Which is now incorporated into the airbox cover. This allows the rider to switch between maps with ease.

Vertigo Design Footpegs: In anodised red with non-slip steel pins.

Tech Racing Forks: Give maximum precision and responsive feedback to the rider.

Reiger 2 Way Rear Shock: Provides smooth & controlled suspension travel, as well as improved traction & stability in all conditions.

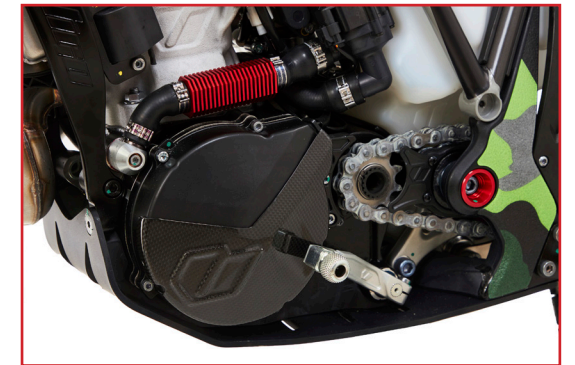

Factory Spec Machined Rear Wheel Rim: In anodised black finish.
